

**FRESENIUS
KABI**

caring for life

MBR DESIGNER

Who are we?

Fresenius Kabi is a global healthcare company specializing in life-saving medicines and technologies for infusion, transfusion and clinical nutrition. Our products and services are used in the care of seriously and chronically ill patients. Caring for life!

Since 2021, we have been producing millions of EasyBags with enteral (tube) nutrition at Emmer-Compascuum at high volume. The factory hall was specially rebuilt for this purpose. Enteral or clinical nutrition is special drink or tube feed that contains all the necessary nutrients that a patient needs per day. Specialist work, for which we are looking for new employees with a healthy dose of curiosity and the willingness to work hard and learn a lot!

The employees are the pillars of our success. Our personnel policy is always future-oriented. In this way, we all contribute to the global growth of Fresenius Kabi. We support you in your new working environment with education and training.

Tasks and responsibilities

What are you going to do as a MBR Designer?

In this position you are responsible for everything around manufacturing batch records (MBR's). This means designing and validating MBR's, creating functional descriptions and maintaining production-relevant master data. You monitor the interfaces to ERP, MES, SCADA and subsystems and analyze physical processes and translating them into MBR's. Providing both weekly production-reports and reports based on special requirements, with creating procedural instructions, write SOP's and make documentation of changes in KabiTrack. Besides this all you participate in MES trainings and give trainings yourself to operators. And participating in technical improvement projects.

This is in short how versatile this position is, a nice challenging position for those who have a passion for automation!

Your knowledge and skills

- Completed education at HBO level in Automation IT or similar
- Work experience in comparable function
- Very good knowledge of process technology in batch industry or comparable
- Principle knowledge of computational programming (e.g. advanced excel-skills)
- Willingness to deeply train into process-understanding and modelling
- Very good analytical skills
- Stress-resistance
- Dutch and English fluent spoken en written

Offer

- Competitive salary
- 26 vacation days + 12 ADV days
- A lot of attention for training
- Enthusiastic Staff Association
