Take control of the pain with Agilia SP PCA to deliver the prescription at your patient's pattern

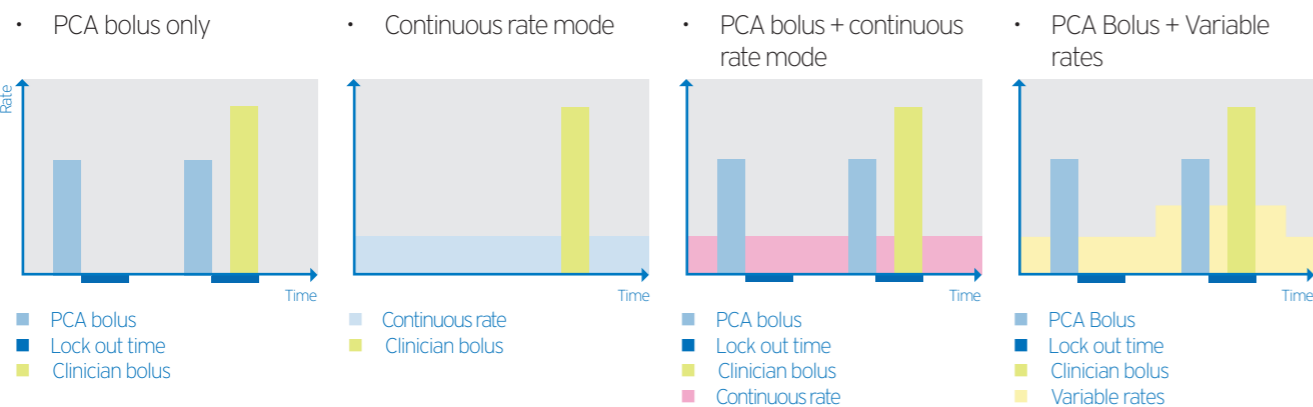

Agilia Connect is as intuitive as ever and now comes with embedded WiFi. Latest standards enable cyber secure communication

Agilia SP PCA

The Agilia pump for Patient Controlled Analgesia (PCA)

Agilia SP PCA proposes 4 PCA modes to accommodate every protocol:

Easy to use

- A detailed history available to follow your patient's events
- Intuitive workflow through a simple Menu
- Easy loading dose and clinician bolus set up
- Monitoring at a glance

Safe

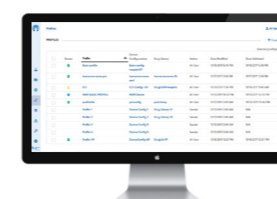

- Full syringe protection with a key lock to complete a safe self-administration
- Keypad protection by password to avoid overdose of medication
- Can be used in general infusion mode with a secured hardware and software protection of the pump
- Possibility to lock the pump to the pole

Ergonomic handset

- Comfortable shape and size for your patient
- Stroke length and soft button to get the right feeling
- Light helps patient locate the handset
- Light blinks to acknowledge PCA bolus request
- Smart compartment to store the handset

Vigilant Master Med

DERS Dose Error Reduction Software

- Web application for multi-point access
- Dataset capability up to 10,000 drugs
- Configurable infusion modes
